PROFESSIONAL SUMMARY

Final-year Data Science student with experience in academic and applied projects involving data cleaning, exploratory data analysis, machine learning, and data visualization. Interested in using data-driven methods to solve business problems and communicate insights clearly. Seeking a graduate data science or analytics role to apply technical and analytical skills in a professional environment.

EDUCATION

University of Technology Sydney | Master of Data Science and Innovation | Jul 2025 – Dec 2026

Relevant Coursework: Artificial Intelligence Principles and Applications, Deep Learning, Data Visualization, Big Data Engineering, Natural Language Processing

University of Technology Sydney | Bachelor of Computing Science | Jul 2022 – Jul 2025

Relevant Coursework: Data Structures and Algorithms, Database Fundamentals, Probability and Statistics, Machine Learning, Data Mining

SKILLS

Programming: Python, SQL, R

Libraries / Tools: Pandas, NumPy, scikit-learn, Matplotlib, Tableau, Jupyter Notebook

Technical Skills: Data cleaning, exploratory data analysis, regression, classification, dashboard reporting

Soft Skills: Communication, teamwork, problem-solving, presentation

PROJECTS

Customer Churn Prediction Project | University Project | March 2026 – May 2026

- Cleaned and prepared customer data using Python and Pandas for model development.
- Built and compared logistic regression and random forest models to predict churn risk.
- Presented model results and key findings through a written report and class presentation.

Sales Dashboard and Trend Analysis | Data Visualization Project | August 2025 - October 2025

- Analysed sales data using SQL and Python to identify monthly trends and product performance.
- Created charts and a simple Tableau dashboard to communicate insights clearly.
- Summarized the main business insights and recommended areas for further investigation.

Survey Data Analysis Project | Statistics Coursework | March 2025 - June 2025

- Conducted exploratory analysis on survey responses using R and Excel.
- Applied descriptive statistics and visualisation techniques to identify patterns in customer preferences.
- Worked in a team to prepare findings and explain the results to a non-technical audience.

EXPERIENCE

Data Intern | Insight Solutions, Sydney, NSW | June 2025 – August 2025

- Assisted with cleaning and organising internal datasets for weekly reporting tasks.
- Supported basic analysis using Excel and Python to help identify data inconsistencies.
- Prepared summary tables and charts for internal presentations and team discussions.

Administrative Assistant (Part-time) | ABC Services, Sydney, NSW | March 2024 – May 2025

- Maintained records and updated spreadsheets to support day-to-day office operations.
- Helped prepare weekly reports and organise information for internal use.
- Communicated with team members to ensure documents and data were accurately maintained.
